FASHION

absolute luxury

Luxury, is popular: most of the time, a costly itself condensed the designers not only wonderful, also holds the engineers excelsior craft as well as the general product and than also, the pay several times more energy and time, it represents a kind of life quality and attitude, which is the connotation of the new luxury.

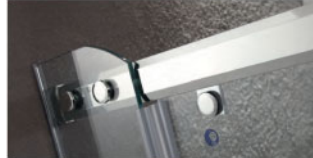

Perfect curves, meticulous detail treatment uses harmonious and magnificent visual effect to bring the family infinite comfortable touch.

10mm, L
The hardware fittings adopt oval adjustment holes, simplifying shower room installation, with fine adjustment range up to 10mm, for more stable product installation.

F-shaped wheel frame is designed in the 304 stainless steel sealed spindle, not easy for water, dirt and dust to enter, lasting and durable.

The product is highly watertight, with rubber seals between components, and with rubber strips, water-blocking strips, stone base, etc., to form waterproofing system, for complete separation of dry and wet area.

Track wall cover unifies with track through installation of wall cover and product upper pull rod, bottom water blocking strip. Through trinity fixing with wall cover, the structure is firm and steady; movable glass does not bear pressure, moving freely, lasting and durable, and with safer structure.

Wheel sealing ring adopts high quality rubber material, with the features of low noise, corrosion-resistance and good sealing effect, etc.

With unique design, simple and clear lines, elegant design without any time limit the shoulder with tide. Don't on secular vision style, make the bathroom life is full of charm.

L-shaped stainless steel handle created by Bemway has concise design, square outside and round inside, made with complete manual work, safe and practical, suitable for large shower room product.

As proved in systematic sliding-door opening and closing experiments, the product is safe, noiseless and durable, running smoothly after 100000 times push-and-pull operation.

F-shaped wheel frame is designed in the 304 stainless steel sealed spindle, not easy for water, dirt and dust to enter, lasting and durable.

Patented hardware parts with product vertical and horizontal adjustment function achieves even stress of glass and effectively corrects wall and floor deviations.

V-shaped track design increases wheel contact area, for good guiding performance and smooth sliding without wobbling.

Wall connecting ends and wall pull rod adopt trinity fixing mode, with firm structure; movable glass does not bear pressure, moving freely, lasting and durable.

Eliminate buckish, woven with natural element, the elegance and gorgeous elegant build by laying bricks or stones in the story of life, your hearstrings.

ARDBEG
Extraordinary process

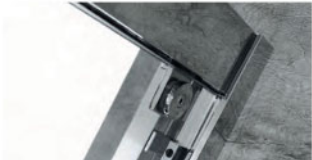

The 3-door linkage used in stainless steel shower room effectively solves the limitation of shower room door opening space. 3-door overlapping increases door opening space.

Carefully selects imported SUS304 stainless steel, strict controls purchasing, selects the best boards in the industry and uses broad 8K mirror-bright frame, with powerful textures.

F-shaped wheel frame is designed in the 304 stainless steel sealed spindle, not easy for water, dirt and dust to enter, lasting and durable.

Y-shaped rail design increases wheel contact area, for good guiding and wagge-free smooth sliding.

The patented hardware fittings design features vertical and horizontal adjustment function, for even glass stress and effective correction of wall and floor deviations.

The product has passed systematic sliding-door opening and closing test, safe, quiet and durable, smoothly operating after 100,000 times of pushing and pulling.

EXPUISITE

Exquisite works of art

Concise appearance could not conceal its extraordinary elegance. Light and shadow build soul of products, texture looms romance, resplendence and dazzle have big heaven and earth, Ramon, build a bathroom scene for you

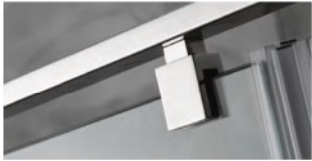

EXPUISITE

Exquisite works of art

Precision cast stainless steel door clamps balance glass stress, with top and bottom clamps for double protection of glass from drooping, firm and durable, with guaranteed safety!

With carefully selected quality stainless steel material and meticulous manufacture, junction of parts can only be seen at the adjustment holes of the fixed piece, and it stands out conciseness and rational beauty from the inside to the outside.

The solid handle uses perspective aesthetics to cast cubic unique shape. Made with pure hand work, it has diamond cutting technique, brilliant textures and mellow lines.

The seemingly simple pull rod is capable of bearing a load of over 150kg—ever used before? It is designed for safety according to body mechanics, to hold up happiness of the whole family.

Matching with rhythm of the family, realizing inside/outside opening function, the bathroom can be customized as you like for free experience!

The all connecting steel is carefully selected SUS304 stainless steel, which uses 3D (front-rear and left-right) adjustment to correct wall deviation.
